Education

VIT Bhopal University

Sept. 2023 – Present

Bachelor of Technology in Computer Science - CGPA : 8.56

Bhopal, MP

Technical Skills

Languages: Python, SQL, Java, HTML/CSS **Databases:** MySQL, PostgreSQL

Data Analysis and Visualization: Pandas, NumPy, Matplotlib, Seaborn, Excel(Pivot Tables, vlookup), Power BI

Tools and Platforms: pgAdmin4, VS Code, Google Colab, Jupyter Notebook, IntelliJ, GitHub

Work Experience

Machine Learning Intern | *The Smartbridge*

May 2025 – July 2025

- Developed and implemented a Prediction model for Exploratory Analysis on Rainfall in India for Agriculture.
- Performed exploratory data analysis (EDA) to identify patterns, trends, and anomalies in the dataset, improving data quality and model performance.
- Documented project workflow, assumptions, and results, ensuring clarity and reproducibility.

Data Visualisation Virtual Experience – Tata Group

Dec 2024

- Completed Tata Group's Forage simulation on data visualisation, gaining hands-on experience in analysing datasets and presenting insights effectively.

Projects

FNP Sales Analysis | *Excel, Dashboarding, KPIs*

March 2026

- Developed an interactive Excel dashboard to analyze 1,000+ customer orders, tracking KPIs such as total revenue, average order value, and category-wise sales performance.
- Utilized Pivot Tables, Pivot Charts, slicers, and conditional formatting to generate dynamic reports across multiple occasions, cities, and product categories.
- Performed data cleaning and trend analysis using advanced Excel functions including VLOOKUP, IF, and COUNTIF, identifying top-performing products and peak sales periods.
- github.com/Shukre-Sahil/FNP-Sales-Analysis

Aadhaar Enrolment Data Analysis | *Python, SQL, Pandas, Matplotlib, Seaborn*

Jan 2026

- Analyzed a large-scale anonymized Aadhaar dataset to identify regional enrolment disparities, leveraging Pandas for data cleaning and handling missing values across millions of records.
- Created high-impact Data Visualizations using Seaborn and Matplotlib, including Heatmaps and Trend lines, to present district-wise enrolment density to stakeholders and used Streamlit for displaying insights visually.
- Engineered optimized SQL queries to aggregate data by 'State' and 'Year', reducing data processing time by 40% compared to standard iterative methods.
- github.com/Shukre-Sahil/Adhaar-Enrollment-2.0

Spotify Advanced Data Analysis | *PostgreSQL, pgAdmin 4*

Dec 2025

- Executed deep-dive analysis on a global music dataset using Advanced SQL to extract engagement insights across platforms (Spotify vs. YouTube).
- Leveraged CTEs (Common Table Expressions) to calculate multi-dimensional KPIs, such as energy-to-liveness ratios and platform-specific streaming variances.
- Applied Query Optimization techniques, utilizing EXPLAIN ANALYZE to interpret execution plans and implementing Indexing to improve performance.
- github.com/Shukre-Sahil/Spotify-Data-Analysis-using-SQL

Certifications

Databases and SQL for Data Science with Python (Jan 2026)

Machine Learning by SmartBridge (Jun 2024)

Achievements / Extracurricular

- HackerRank SQL badge - Silver Level(4 Star)
- Ex- National Service Scheme(NSS) volunteer, a government-sponsored programs focused on community service and student development.
